

IN KOREA

RESOURCES, GUIDANCE AND PROFESSIONAL SUPPORT
TO SUCCEED IN KOREA

IN2KOREA

■ ABOUT THE PROGRAM

In2Korea gives startups, investors and professional job seekers the support, expertise and resources they need to succeed in Korea. Participants get on-demand access to experts in fields like law, finance, HR and marketing, along with other perks like free office space. They are also paired with mentors who have established or run businesses in Korea and can guide them smoothly through the process.

For startups, Korea has become a new hub in Asia, offering a safe, stable environment, the world's most connected technology infrastructure, world-class talent and a wealthy population of early adopters. Korea's high tech ecosystem is equally attractive to investors and job seekers. But getting started in a new country is always a challenge. That's why Korea's National IT Promotion Agency (NIPA) created In2Korea, which kicked off in August 2017.

■ WHO CAN APPLY

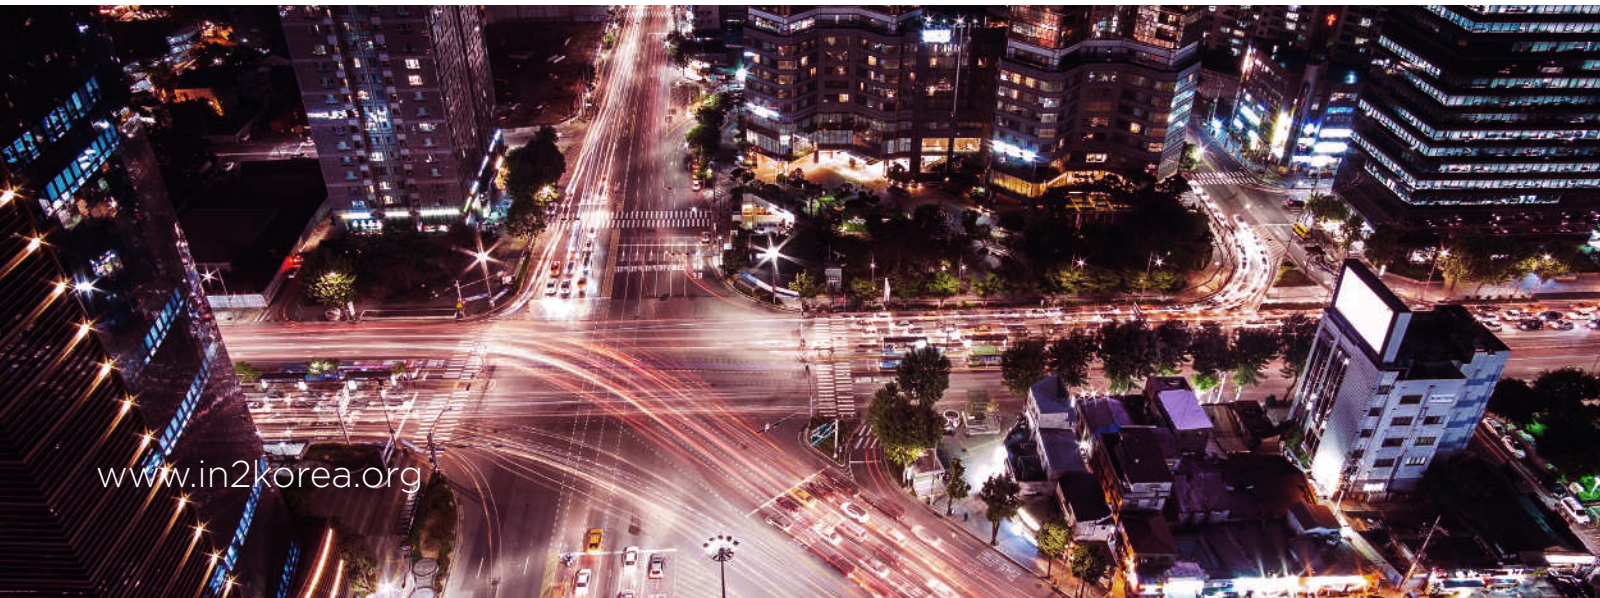

Startups and entrepreneurs who want to bring their ideas to Korea

Professionals who want to put their skills to use for Korean startups or other companies
